| 15. Your child is eager to collect monies or goods to help the needy. | Yes__No__ |
| 16. My child believes money is the tool of the devil. | Yes__No__ |

Scoring. First know that whatever result that you calculate does not mean that your child possesses entrenched values. With your guidance, influence and financial education, your child's relationship can be channeled in the direction which benefits his future. Your totals point towards those traits which your child may have developed under your nose or as a result of your influence. The quiz will also reveal in which area your child's money traits may need nurturing. Of course, as parents we hope that our child has the personality of a saver and philanthropist. But those characteristics must be nurtured to ward off the selfish, impulsive spending traits of most children.
